

# Encom Software

*Encom Profile Analyst gives you more control over your geophysical data than ever before. With Profile Analyst, you can see and compare all your line data, profiles, grids, modelling, images, maps, drillholes and 3D visualisations in a single interactive interpretation environment. A full range of analytical functions, effective presentation tools and powerful template capabilities help you to complete your expert analysis more quickly, comprehensively and effectively.*

## ENCOM Geophysical Software

### Encom Profile Analyst

Expert geophysical analysis tool

### Encom ModelVision

Family of magnetic and gravity interpretation tools

### Encom QuickMag

3D solid geology mapping from magnetic surveys

### EM Vision

Transient electromagnetic display, analysis and modelling

### EM Flow

Airborne transient and frequency electromagnetic interpretation

### Noddy

3D workbench for geological and geophysical modelling

## ENCOM GIS Applications

### Encom Discover

The integrated GIS for the geosciences

### Encom Discover Mobile

GIS-based field data capture and display

### Encom Discover 3D

Fully integrated 3D GIS solution for the resource sector

### Engage3D

The new dimension for MapInfo Professional

### GPInfo

Australasian petroleum permits, wells and other exploration data

### MapInfo

MapInfo Professional and other MapInfo software and datasets

### ER Mapper

Helping people manage the earth

## Key Benefits :

- Cost effective
- Based on Digital Maps
- Suitable for Exploration
- Management

**Please contact us for further details :**
